### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Hsu (Reg. No. 46,782) on February 14<sup>th</sup> 2005.

2. The application has been amended as follows:

Claim 1 (currently amended): A method for creating a mobile multimedia framework application programming interface (API) capable of operation in mobile hardware devices, comprising the operations of:

setting API component access parameters to utilize a synchronous programming model;  
setting API components to a pull data delivery protocol; and  
removing master/slave functionality from the API components, the master/slave functionality being only utilized in an application layer.

Claim 5 (cancelled)

Claim 8 (currently amended): A mobile multimedia framework application programming interface (API) capable of operation in mobile hardware devices, comprising:  
a codec;

Art Unit: 2126

a data source in communication with the codec; and

a media engine having a plurality of components in communication with the codec and the data source, wherein each component is accessible utilizing a synchronous programming model, ~~and~~ wherein each component utilizes a pull data delivery protocol, wherein each component is set to exclude master/slave functionality, and wherein the master/slave functionality is utilized in an application layer.

Claim 9 (cancelled)

In claim 10, at line 1, replace “9” with – 8--.

Claim 13 (cancelled)

Claim 16 (currently amended): A method for creating a mobile multimedia framework application programming interface (API) capable of operation in mobile hardware devices, comprising the operations of:

setting API component access parameters to utilize a synchronous programming model;

setting API components to a pull data delivery protocol;

removing master/slave functionality from the API components, the master/slave functionality being only utilized in an application layer; and

providing a specialized player, wherein the specialized player is designed to process a specific type of multimedia data,

wherein a memory size of the mobile multimedia framework API is less than 100 kilobytes.

Claim 19 (cancelled)

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The following is an examiner's statement of reasons for allowance:

Although Keeley (U.S. 6,138,271) teaches reducing the size of the operating system for use with an embedded computer by keeping only operations directly or indirectly referenced by the application program, and Travostino (Real-Time Local and Remote MACH IPC: Architecture and Design) teaches the x-kernel framework can be built in both user space and kernel space without differences, the prior art of record fails to teach the following limitations "removing master/slave functionality from the API components, wherein the master/slave functionality can and/or is only utilized in an application layer" (see Figs. 2 and 3 and Specification page 23 for support).

Art Unit: 2126

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Diem K Cao whose telephone number is (571) 272-3760. The examiner can normally be reached on Monday - Friday, 8:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
